

## Fireproofing Services

### Offering 30 Years of Fireproofing Experience

#### INTRODUCTION

As a Brand Energy & Infrastructure Services company, Aluma Systems provides clients with more than 30 years of combined experience in delivering successful fireproofing projects. Brand employs a team of proven fireproofing and technical specialists that are experts in a variety of fireproofing applications and installation methods. Our specialists possess an average of three years of experience, and many are cross-trained in other related services such as scaffold, insulation, painting and refractory, allowing us to leverage their capabilities for broader project needs.

In addition to our skilled and certified team of specialists, who provide services for onsite applications, Aluma possesses substantial shop and yard facilities that are capable of managing off-site applications. When industrial construction professionals are seeking fireproofing services, they trust Aluma to provide the know-how to consistently deliver unmatched results.

#### Fireproofing Service Offerings

- Epoxy Systems
- Form and Pour
- Pneumatic, Spray and Troweled applications
- Dense Concrete and Lightweight cementitious
- Hand Packing
- Corrosion under Fireproofing management (CUF)

## CASE STUDIES

### VALERO REFINING

#### Texas

When North America's largest refiner Valero Refining needed a trusted partner to provide specialty services for a major 2006 turnaround, they turned to Brand. The Brand team safely and efficiently worked over 160,000 man-hours to provide fireproofing, refractory, scaffolding, insulation, abatement services to this site. Our client praised the project management team and field craft personnel for working hard to exceed all their expectations. Valero chose Brand as the trusted partner for this critical and time sensitive project because of the value in our integrated service offerings and a seamless execution.

#### Maintenance Manager

*"I would recommend your company (Brand) for future projects of any size, especially those requiring multiple services for your ability to manage all of these services under one project management team."*

### A MAJOR REFINERY

#### West Texas

As a part of a major plant rebuild at one of our client's West Texas facilities, Brand was asked to perform a variety of fireproofing services throughout the refinery. One of the critical components of this project was the rapid deployment of manpower, equipment and material to the site in order to ensure that the fireproofing was completed on time to maintain compliance with the client's corporate requirements. Because Brand employs one of the largest skilled workforces in our industry, we were able to rapidly respond and meet the needs of our client. This large scale fireproofing installation project involved a variety of applications including Sand/Cement and Fendolite and required more than 25,000 labor hours.
